PROJECTS

Let's Travel   Oct 2023

Node.js, Express, MongoDB, JavaScript, EJS

This is a Full Stack project where you can post about your travel journey with feature of adding photo of place you visited. You can edit and delete your post too. You also get register and login feature. Feature of mail and phone notifications is also added.

Check out Video to know project features in Visual Representation.

Nike - Landing Page   Dec 2023

React.js, Tailwind CSS, JavaScript, Responsive Design

This is a Front End project where you can see Nike - Landing page. This project is an outlook of Nike official site and is fully responsive which I achieved using Tailwind CSS.

HooBank - Future Bank Landing Page   Dec 2023

React.js, Tailwind CSS, Responsive Design, Vite

This is a Front End project where you can see a modern UI/UX design for future bank sites. This project is made on Mobile-first approach so it's fully Responsive.
I have used Tailwind CSS for achieving responsiveness.

YouTube Clone   Jan 2023

MERN, REST APIs, React.js, JWT, MongoDB, Express

This MERN stack project is clone of YouTube. In this clone you will see many same features as of actual YouTube site. I have used React for Frontend and React-Router for making this a Single Page Application.
I have used JWT for authentication.
